“ This is a guidebook for travels through the art world. ”

Adoquei's is an authoritative voice, whispering encouraging words to the student who desires to make "artist" one's vocation instead of one's (very costly) pastime. He writes with experience about the intangible and theoretical (the truths about talent, passion, attitude, style, and worth) and the technical and practical (finding a teacher/mentor; developing skill; devotion to practice; learning drawing foundations; devotion to study; the importance of focusing on the basics of multiple subjects, composition, and art history; entering competitions and working with galleries). This is a guidebook for travels through the art world; a reference both the newcomer and seasoned student of fine arts.
